

Windows10, 11, 8 , 8.1, XP, win98

Ek production ka linux machine me jitne kam se kam tool ya software ho wahi machine production compliant hota hai..

Abhi ka Target - Deploy Netflix Application on Linux Machine.

Linux ka computer kaha par aaega?

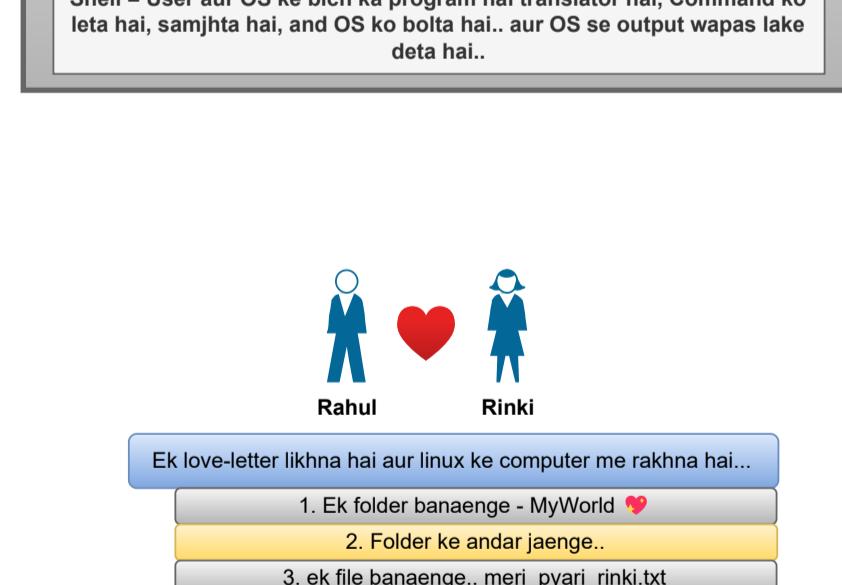

killerkoda.com

Abhi padne ke lie aisa machine lenge jisme GUI bhi ho aur CLI bhi ho..

Task	Windows me kya kya kara?	Linux
Logged In User Dekhna	Windows button pr click karke, User dikhta hai	whoami
Present working directory	File Explorer me upr me dikh jaega	pwd
Back kaise jaenge?	Upr se Back button daba ke jaenge	?
Folder me kaise jaenge?	Double Click karke	cd
New folder banana	Right Click-> New Folder	?
File Download	Using Browser	?
Folder Delete	Right Click-> Delete	?

Windows aur Linux ko compare karke feel karte hai andar tak..

Command me spaces nahi hote..  
whoami

Rahul Rinki

Ek love-letter likhna hai aur linux ke computer me rakhna hai...

1. Ek folder banaenge - MyWorld ❤️

2. Folder ke andar jaenge..

3. ek file banaenge.. meri\_pyari\_rinki.txt

4. File ko kholenge.. aur likhenge

Rinki.. Hum tumhe bahut pyaar karte hai.

5. File ko kardenge save

6. File ko open karke check karnege ki content save hua ki nahi

Task	GUI	CLI
New folder banana	Right Click-> New Folder	mkdir
Folder kaha bana?	upr me dikhta hai	pwd
Folder me kaise jaenge?	double click karke jaenge	cd
Kaha pr hai?	upr me dikhta hai?	pwd
Folder me kya hai?	direct hi dikhta hai	ls
new file banange	Right Click -> New File	touch
Edit karne ke lie	notepad	nano
Content check karne ke lie	double click karke open karke dekh sakte hai	cat

Linux ka GUI kabhi nahi dekhna hai, sirf class me samjhne ke lie use karenge apn..

Linux ka practice sirf **killercoda** par karna hai..
